

The facility that produces our Gluten Free ("Black Box") nuggets and tenders also produces our world famous "Blue Box" items that contain gluten. However, great care is given to protect against gluten containing products from coming in contact with Gluten Free products. The process begins with training. All new hires are trained in the handling of allergenic materials used in that facility - Milk, Eggs, Soy Beans, Wheat and Gluten. Whenever ingredients are delivered, all allergen containing ingredients are identified, tagged and segregated from other ingredients and packaging materials. If a spill were to occur, only specifically identified cleaning materials may be used to clean up the allergen. All Bell & Evans Gluten Free products are produced at the beginning of a shift and only after all processing equipment has been thoroughly cleaned and sanitized. In addition to our sanitation and segregation protocols, we begin each new shift of Gluten Free production with Fresh, Non-Hydrogenated Vegetable Oil.

Our Gluten Free Breaded chicken nuggets are made with Rice Flour and Yellow Corn Flour giving you a healthy, great tasting alternative to products made with wheat flour. Made with All Natural Ingredients; Lightly breaded to accentuate the natural chicken flavor; No chemical additives or preservatives; Tested for maximum gluten level of less than 20 ppm.
