

Our facility is completely peanut and tree nut free. We require each of our ingredient suppliers to provide a non-contamination statement for our records. For additional security, we perform ELIZA rapid peanut tests on the raw ingredients as they arrive at our facility. Lastly, we send out samples of all our mixes for additional testing for peanuts, dairy, egg, and gluten to an outside certified lab. We run our products on dedicated equipment that does NOT share dairy or egg products. Our raw ingredients are also dairy or egg free and we use certified testing to confirm that our finished products are in fact dairy free. Currently, any of our products that contain Chocolate chips do contain soy lethicin such as our Regular Chocolate Cake and our Regular and Gluten Free Chocolate Chip Cookie mixes. All our other mixes are soy free including our Wheat Free, Gluten Free Chocolate Cake. Our Gluten Free Chocolate Cake Mix packaging features a purple border and “swish” to indicate that it is gluten and wheat free. Cherrybrook Kitchen mixes do not contain any chemicals, preservatives, artificial flavoring or colors.
