

*Enjoy Life Natural Brands produces products that are gluten-free and free of the 8 most common allergens. They are produced in a dedicated and/or certified gluten-free and dedicated nut-free manufacturing facility. All of our products are all natural, non-GMO, certified kosher, and certified by the Gluten Free Certification Organization. Our products are free of wheat/gluten, dairy/casein, peanuts, tree nuts, egg, soy, fish, shellfish.*

### **- Enjoy Life Natural Brands Quality Assurance -**

The primary concern of Enjoy Life Quality Assurance is to assure that our food products are safe and that they meet or exceed the rigid quality standards associated with our brands. Our bakery strictly adheres to Good Manufacturing Practices (GMP's), Sanitation Standard Operating Procedures (SSOP) and a preliminary HACCP (Hazard Analysis Critical Control Point) plan ensuring the utmost in food safety considerations. The entire operation is overseen by a certified HACCP Quality Assurance Manager.

#### **Responsibility**

The Quality Assurance group helps establish, maintain, and evaluate product and process specifications. The group is responsible for preparing and distributing routine quality reports, quality improvement reports, process capability evaluations, government records and customer information. In addition, Quality Assurance technicians perform audits to evaluate all phases of the quality system, including sanitation, product performance, and quality training. Finally, Quality Assurance technicians have the authority to restrict shipment of any product not meeting specifications.

#### **Quality Supplier Program**

Quality products begin with quality ingredients. Enjoy Life requires its ingredient suppliers to complete annual non-contamination certificates. If allergen contamination in their plant is possible, they are required to follow best practice procedures (i.e. vigorous line cleaning, dust collection) as prevention. For extra assurance, we perform routine allergen tests for gluten (to 5ppm), peanuts, tree nuts, soy and casein.

#### **Summary**

Enjoy Life Natural Brands follows an established and functioning Quality Program that involves Prerequisite Programs, Quality Standards, Regulatory Requirements, Customer Requirements, and HACCP. Every aspect from beginning to end is monitored by Production and Quality Assurance. This supports our commitment to safety, quality, and taste.

Sandy Kasten, Director Quality Assurance
