

Keys products contain no dairy, wheat, egg, soy, fish, shell fish, soy, peanut. Shea butter is used in all lotions and fractionated coconut oil is saponified and used in Castile Soaps. The vessels used to produce Keys products are dedicated and not used to manufacture any other products that may contain different ingredients.

Keys manufactures in a cGMP ISO900 facility that has organic certification for manufacturing personal and pet care products. The facility is FDA inspected. The company follows food manufacturing standards using super-heated steam to disinfect stainless steel vessels. All implements are cleaned in a similar fashion with the use of 90% isopropyl alcohol to disinfect fragile instruments. These instruments are evaporated before use.

All ingredients and raw materials are tested prior to use for gram positive rods and other forms of microbiological contamination. Finished goods are tested in the same way with a 72 hour incubation period prior to shipment.
