

Natures' Path wants to assure you that we are dedicated to producing exceptional products and hold the health of our customers along with quality and food safety as our top priorities. That is why we inspect our manufacturing facilities, continue to carry out our own internal testing as well as sending out product to be independently tested to ensure that they are gluten free. We hold ourselves to extremely high standards of food production and remain absolutely committed to providing a consistently safe product to our customers. We manufacture our gluten free cereals together isolating them from any products that contain gluten. All processing equipment is thoroughly cleaned before a run of gluten free cereals. To further ensure that our lines are free of any gluten containing grains, a specified portion — at the beginning of the run — is not utilized in gluten free cereals. Our equipment is inspected in order to maintain our cleaning standards.
